

OVERVIEW

Our Memory & Learning CPD workshops explore the psychological research behind the most effective strategies to improve students' long-term memory.

Based on our book *The Science of Learning*, this workshop covers the best evidence-based learning and revision techniques, such as: retrieval practice, spacing, interleaving, dual-coding, the production effect, elaborative interrogation and pre-questions.

KEY MESSAGES

Retrieval practice

- Generating an answer to a question
- How both staff and students can use retrieval practice

Spacing

- Spacing vs cramming
- How to weave spacing into your lesson design

Interleaving

- The importance of mixing up the topics within a subject

Dual-coding

- The power of combining words with pictures
- Integrating diagrams with descriptions

The production effect

- Reading out loud vs reading in silence
- Other techniques to harness the production effect

Elaborative interrogation

- The importance of self-questioning
- The best questions to ask yourself

Pre-questions

- An effective way to start a lesson

THIS WORKSHOP WILL HELP TEACHERS:

- ✓ know the strategies that have been shown to work
- ✓ improve learning in their classrooms
- ✓ transform student revision techniques performance

BOOK THIS WORKSHOP NOW

Our workshops are interactive and engaging. It's one of the reasons we get such great feedback from staff and students. Get in touch now to discuss booking this workshop on **020 8693 3191** or **info@innerdrive.co.uk**
